2.,	The tank cars have an average capacity of 15 to 20 cubic meters.
3	Unitgoing shipments by truck and tank trucks during the period of observation included only motor vehicles
	Comment. The incoming shipments confirm the previous assumption that the corps fuel denots of the air force which include the Alen fiel denot, are partly surplied from the central air force fuel denot at Velten and partly from the hydrogenation plants. The list of incoming shipments is incomplete as it fails to cover the month of August. According to other reports, the Alen denot also received fuel in August. Alen serves the regiments of the southern fighter corps.
	to and of one southern regime.
3 5	Comment. The volume of outgoing shipments in July and September 1952 was twice as much as that in August. The same observations were made relative to the two bonder regiments stationed in Werneuchen.
